Professional Summary

DevOps Engineer with 3.5 years of hands-on experience in cloud-native environments. Focused on automating deployments with AWS, Docker, and Kubernetes. Passionate about reducing friction between dev and ops in fully remote teams.

Core Skills

AWS (EC2, S3, Route53, ECS, EKS, CloudWatch)

Docker (compose, swarm) & Kubernetes (minikube, kubernetes)

CI/CD (GitLab CI, GitHub Actions, Jenkins)

Linux (Ubuntu), Bash scripting, Terraform basics

Experience

Junior DevOps Engineer | AppStream (Remote)
Oct 2021 – Present

Containerized 8 legacy applications using Docker and deployed them to AWS ECS with Fargate.

Migrated staging environments to Kubernetes (EKS), reducing resource waste by 20%.

Collaborated with development teams to design Dockerfiles and Kubernetes manifests for microservices.

Maintained Linux-based build servers and automated daily backups using Bash scripts.

Education

B.S. in Network Engineering – Florida International University, 2020
