Professional Summary

DevOps Engineer with 4 years of remote cloud-infrastructure experience. Designed and maintained Kubernetes clusters on AWS (EKS) supporting 100+ microservices. Strong advocate for GitOps and infrastructure automation.

Core Skills

AWS (EC2, S3, VPC, IAM, EKS, RDS)

Docker, Kubernetes (Helm, Kustomize, ArgoCD)

Infrastructure as Code (Terraform, CloudFormation)

Linux administration, Bash/Python scripting, Prometheus/Grafana

Experience

DevOps Engineer | CloudNative Solutions (Remote)
Feb 2021 – Present

Migrated 40+ services from EC2 to EKS with zero downtime, reducing infrastructure costs by 18%.

Automated Kubernetes deployments using Helm and ArgoCD, enabling rollback in under 2 minutes.

Managed Docker images and registries (ECR), implemented security scanning in CI.

Certifications

AWS Certified DevOps Engineer – Professional

Certified Kubernetes Administrator (CKA)
