SUMMARY

B.Tech Computer Engineering student specializing in Cybersecurity with skills in Python, Java, React, TypeScript, and full-stack web development. Interested in secure software development, AI-driven security solutions, and SCADA security. Strong analytical and problem-solving skills with practical project experience and a passion for emerging technologies.

WORK EXPERIENCE

Media Associate @ Karunya Innovation and Design Studio, Coimbatore Aug 2025 - Dec 2025

- Creating and editing content for social media, websites, blogs, and marketing campaigns.
- Managing social media accounts and scheduling posts.
- Monitoring audience engagement, comments, and performance metrics.
- Assisting with digital marketing and advertising campaigns.
- Conducting research on trends, competitors, and target audiences and preparing reports

Summer Intern @ Edunet Foundation June 2025

- Statistical Machine Learning Project: Predicting "Kicks" in Auctioned Cars
- Goal: Predict whether an auctioned used car is a "kick" (a vehicle that turns out to be difficult to sell or causes losses) before purchase.
- Tools: Python and common ML libraries.

Software Developer Intern @ HASpaces Technologies, Trivandrum June 2026

- Completed software development lifecycle, improve problem-solving abilities, and gain hands-on experience in building a real-world application – BOREAS Project.

AI Marketing Intern @ FlyRankAI July 2026 - November 2026

- Focusing on AI Marketing as an AI intern
-

PROJECTS

NetTrafficAnalyser June 2025

- The Network Sniffer is a Python-based tool designed to capture and analyze network packets in real-time. Utilizing the powerful Scapy library, this project enables users to monitor network traffic, inspect packet details, and gain insights into the data flowing through their network.

TUMAINI - Web based secured application April 2026

- Developed a full-stack banking application enabling secure user authentication, real-time fund transfers, loan management, and transaction tracking. Built using Node.js, Express, and PostgreSQL with a responsive frontend, ensuring data consistency and role-based access for customers and administrators.

PHOENIX AI APPLICATION

February 2026

- Phoenix AI is a solution developed by The Phoenix Knights for the AWS AI for Bharat Hackathon. It is an **AI-powered virtual** assistant designed to improve public access to information regarding scholarships, education, skills training, and government services

KAVAH - FAKE APP DETECTION USING MACHINE LEARNING SCORES

May 2026

- This project focuses on the development of a web-based system for detecting fraudulent mobile applications using Machine Learning integrated with the **Django framework**.

GOVERNMENT AND PUBLIC SERVICES--- NETWORK BUILD

January 2026

- This project focuses on the development of a web-based system for detecting fraudulent mobile applications using Machine Learning integrated with the Django framework.

QuantaHelix: A DNA-Centric Encryption Protocol forBiometric and Post-Quantum Secure Communication

November 2025

- This project presents a revolutionary cryptographic model that integrates DNA sequencing, artificial intelligence, and post-quantum cryptography to establish a biologically bound encryption ecosystem.

Weather Dashboard with Historical Data Storage

June 2024

- This project builds a weather monitoring dashboard that collects, stores, and analyzes weather data. The system fetches real-time weather conditions via an API and logs them in a database for historical analysis. Users can visualize trends such as temperature fluctuations, humidity, and rainfall patterns.

EDUCATION

Bachelor of Technology in Computer Engineering

July 2024 - July 2028

Karunya Institute of Technology and Sciences

- Specialization in Cybersecurity.
- Full Stack Development and Research on Security

12th Grade

Govt Higher Secondary School, Punalur

2022-2024

- Bio Maths

ADDITIONAL INFORMATION

- Technical Skills:** AWS, Python, Java, JavaScript, C programming, PostgreSQL, Django Framework, Cisco Packet tracer, MongoDB, Express, GraphQL, Docker, Kubernetes, TypeScript, Tableau, PowerBI
- Languages:** English, Hindi, Malayalam, Sanskrit
- Hobbies:** Reading, Travelling
